EXPERIENCE

- Full Stack Web Developer** 2024 - 2025
CV. Anugerah Karya Indonesia, Semarang, Jawa Tengah
 - As a Full Stack Web Developer at Anugerah Karya Indonesia, I am an expert in building and maintaining SIMPEL (Student Information System) applications. I used Laravel for the backend and Flutter for the frontend, creating a secure RESTful API and responsive user interface. My focus is on effective technical solutions, rigorous testing, and strong team collaboration to produce high-quality applications.
- Front End Developer** 2024
PT. Sahaware Teknologi Indonesia, Bandung, Jawa Barat
 - As a Front End Web Developer, I am an expert in building responsive and interactive user interfaces for Eventives applications using Next.js. I focus on creating high-quality code, seamless API integration, and performance optimization to provide the best user experience.
- Mobile App Developer** 2024
PT. Savenly, Bandung, Jawa Barat
 - As a Mobile Developer at PT Savenly, I developed the Kliktron App application using Flutter, a mobile-based electronic shop information system platform. My focus is on creating applications that are user-friendly, efficient, and provide an optimal user experience.
